

The brilliant **FRAMELESS** display system

COMPLETE DISPLAY SOLUTIONS
EMERGENT  **DESIGNS**

Invest in your message, not the structure.

The **Frameless** display system utilises state of the art digital imaging combined with a sophisticated laminating process to produce an ultra lightweight display that is unencumbered with bulky frames, clips and widgets that accompany other display systems. The result is maximum visual impact for your sales message in a display that is truly easy to use and transport. And because you don't pay for any hardware, **Frameless** is also great value for money.

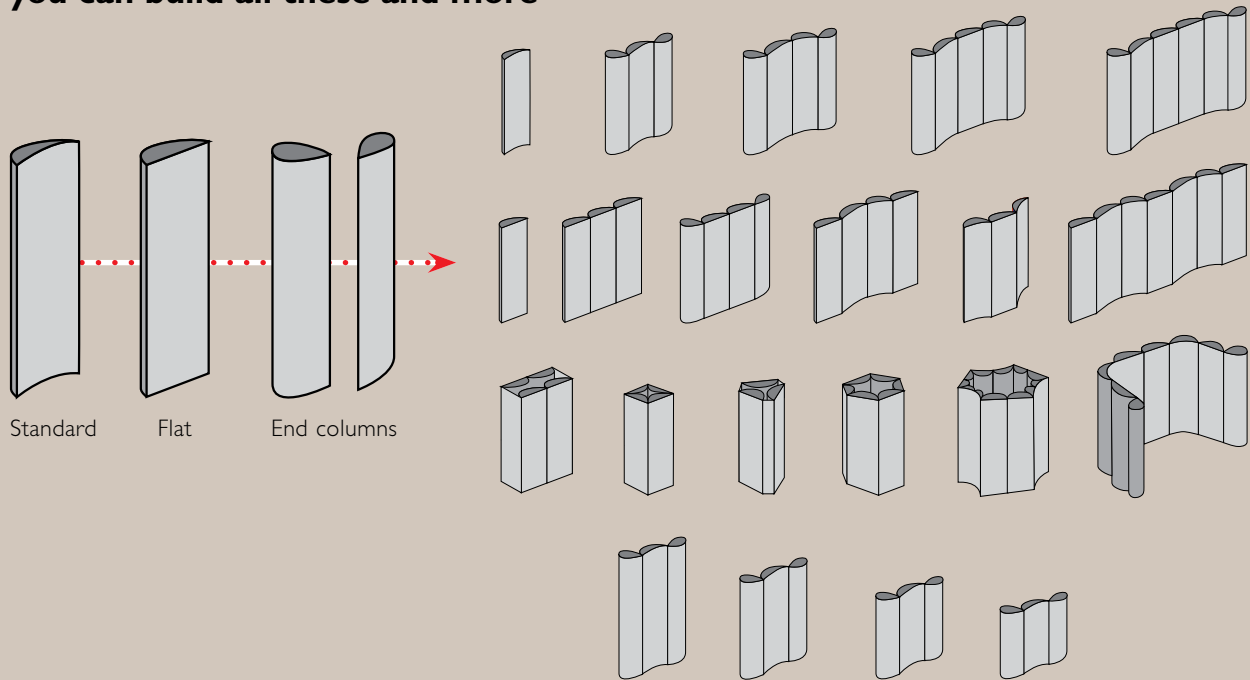

The **Frameless** concept is extremely versatile. Create lightweight tables, lecterns, towers and any manner of display material. Being modular we can also add or subtract modules to change the size of your display or connect your displays in a myriad of combinations to make displays of all shapes and sizes.

- **Connects together with no frames, clips or widgets**
- **Ultra lightweight and portable**
- **Modular and versatile**
- **Easy to assemble**
- **Great value for money**

The world's most innovative portable display system.

With the 4 basic building blocks (modules) of the *Frameless Display System* you can build all these and more

It's a uniquely versatile concept

Logo table

Table top
