

## Kongsberg i-XL Flatbed Cutter

The latest addition to Emergent Designs services is the **Kongsberg i-XL Flatbed Cutter**. This cutter adds to our already large array of print and display finishing options with accurate and speedy computer controlled cutting and routing.

### **i-XL Flatbed Cutter Features:**

- Digital controlled cutting – faster and cheaper for short to medium runs then die cutting.
- Large bed – cuts up to 3m x 1.6m
- Photo eye registration – will register and cut printed materials.
- Has a vast array of cutting tools; will blade cut cards and foam boards, cut and crease corrugated box boards, kisscut vinyl, router cut woods, acrylics and other materials.

### **i-XL Flatbed Cutter's uses:**

- Cutting and routing shapes out of cards, woods, foam boards and plastic for sign and display production.
- Digital profile cutting of printed boards.
- Large run digital cutting of printed materials.
- Box and carton production: prototyping and short runs.
- 3D and engraved signage in woods, acrylics and foam boards.
- Kisscut of vinyl stickers.
- Corrugated point of sale displays.
- Bookbinding covers.
